Business Information

THESE PRICES are in effect for Fall 1945—Spring 1946 season.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists and dealers.

PACKING. All goods are packed in boxes and bales for which we charge sufficient to cover cost of material used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.**

TERMS. We offer the usual terms: net 30 days from date of shipment to those of known responsibility **but must have satisfactory business references from others or remittance must accompany order.** Those desiring stock shipped COD will please remit **one-fourth** the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP. Whether by express, motor truck or railroad freight. If by motor truck or railroad freight, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgement as to route and method to use. **It is mutually agreed that whether you name the route or you leave it to our own selection that we will not in any way be responsible for time or condition of delivery and that our responsibility ceases upon our delivery to the transportation company.**

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping the different plants but if you want them out of season and are willing to take the risk of good delivery we will pack with the utmost care and get them off to you at most any time you want them.

Plan to Visit Our Nursery

We will certainly be glad to have you come see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Del., 100 miles from Cape Charles, Va., 90 miles from Annapolis, Md., via Matapeake ferry, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N. Y. We hope the war will soon be over then you will have plenty of gas to visit us, and to come get the stock in your truck.

Blueberries

Blueberries have come to the front as a best seller during the past two seasons. Order early.

There has developed an enormous demand for these plants, especially for fruit. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle. Put in a small stock and let us supply you; we will send to you or direct to your customers under your tags. We suggest ordering early as we have not been near able to supply the demand for these plants the past two seasons.

Prices of Blueberry Plants	Each	10	100
6 to 12 in., 2 yr.	\$0.60	\$5.00	\$40.00
12 to 18 in., 3 yr.85	7.50	60.00
18 to 24 in., 4 yr.	1.00	9.00	85.00

If larger plants are wanted send inquiry for prices.

Description of Varieties

BURLINGTON. This is one of the newer varieties. Berries are excellent flavor, very large size and quite uniform. An unusually good keeper. Bush is medium high and crops heavily, and later in the season than other late varieties.

CABOT. A very early variety. Plants seldom exceed three feet in height and make a broad low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor. Can only furnish this in 6 to 12 in. and 12 to 18 in. sizes.

CONCORD. The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter. They usually ripen a few days earlier than Rubel and are very fine in flavor.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden-brown. The berries are among the very largest, light blue and ripen about the same time as Rubel.

JUNE. A little earlier than Cabot. Berry is large, of medium blue color, sweet and delicious when fully ripe, with a slight sub-acidity. Newer and probably better than Cabot.

RANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

RUBEL. A vigorous, productive variety. Well developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July.

STANLEY. Some consider this the most delicious of all the blueberries. Produces good yields of large berries in mid-season. This is one of the newer varieties.

WEYMOUTH. The earliest of the Hybrid Blueberries. A cross between June and Cabot. The berries have only a moderate degree of acidity, and they are sweet, subacid, and delicious. A new introduction and we offer a limited supply at \$1.00 each in the 12 to 18 inch size.

Strawberries

GEM (Fall-bearing)

We have a good supply of this popular Everbearing variety at \$25.00 per thousand for delivery after October 15th 1945 and through Spring season of 1946, as long as they last.

You Should Grow The Rare Franklinia

(FRANKLINIA ALTAMAHA—GORDONIA ALTAMAHA)

One Of Our Best Sellers

This exquisite fall flowering tree was brought in 1777 from the banks of the Altamaha River in Georgia to Bartram's garden at Philadelphia. John Bartram recognizing its extraordinary beauty and value, named it in honor of his life-long friend, Benjamin Franklin.

The original grove of Franklin trees was again visited in 1790, but from that day to this no one has seen these trees growing in the wild though many expeditions have searched the banks of the Altamaha for it.

Franklin's tree is beautiful in detail and marvelous in landscape effect besides blooming at a season when few shrubs or trees are in flower.

The slender trunk and graceful branches are so muscular and sinewy in appearance that one almost expects motion as under a greyhound's skin. The bark is smooth and dark gray, with wavering lengthwise markings of lighter color.

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From its shelter emerge four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. There is a constant succession of bloom till hard frost. We frequently get the unusual effect of a tree clad in crimson autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than three or four feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens thirty feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun and has proven entirely hardy about New York and hardy in favorable locations about Boston. It is an especially desirable tree for the small intimate garden, loved and lived in. It is a charming lawn tree and the grass may be allowed to grow closely about the trunk. It also thrives when planted by pools, lakes and streams. Its light elegance of form and color contrasts exquisitely with the dark green of conifers.

Azaleas

Varieties with an * are the hose-in-hose or double type.

Each X means one transplanting.

Our 1-yr field beds XX trans. have been grown in pots one year and in outside beds one year thus making them really two years old. The 2-yr. in field beds XX trans. are two years from pots and thus three years old. Please remember this when comparing prices.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted for forcing—thousands of them being sold for Easter, Mother's Day and Decoration Day. They are comparatively easy to grow and they make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out of doors as far north as Long Island. They are extremely floriferous, and in season the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

Azalea Rooted Cuttings

Something New and Good Gable's Hardy Azaleas

These hybrids have been made in the effort to originate a harder strain of the Japanese type of Azalea in better form and color than has heretofore been available in hardy varieties.

As to hardiness: these varieties will average harder than Hinodegumi and Amoena and much harder than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured.

Prices of Gable Azaleas:	10	100
* 1 yr. field beds XX trans.	\$3.50	\$30.00
* 2 yr. field beds XX trans.	4.50	40.00

Not less than five of a kind at these prices.

BILLY. Bright red; single flowers.

BOUDOIR. 3 ft., dense, broad. Foliage hid under large blooms, watermelon pink.

CAROLINE GABLE. Open growth, 6 ft. Radiant pink. Noticeable at a quarter mile.

CHEROKEE. 5 ft. early. A scarlet flush, completely covered with bloom.

CHINOOK. 4 ft., early. Double, salmon-red. Covered with bloom for long season.

CORSAGE. 4 ft., broad bush. Single, large orchid blooms almost cover the bush.

ELIZABETH GABLE. 5 ft. One of the best evergreen azaleas. Late, sore-pink flowers. Reliable bloomer.

In addition to above two sizes we have a few plants of Elizabeth Gable in 6 to 8 in. diameter at 75c each, 8 to 10 in. at \$1.00 each, 12 to 15 in. at 2.00 each.

GRENADIER. 3 ft. Broad. Covered with large, single, bright scarlet blooms.

MILDRED MAE. 3 ft. Broad and shapely. Early, lavender with red spots. Evergreen.

OLD FAITHFUL. 6 ft. Early, deep orchid. Vigorous. Regular bloomer.

ROYALTY. 6 ft. Broad, compact evergreen. Bright purple, double flowers.

No. 38. Double, salmon-pink flowers. Very hardy. Profuse bloomer.

No. 49. Single, light pink. Low grower.

No. 54. Single, salmon-pink, hardy, free bloomer.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are offering.

ARNOLDIANA AZALEAS

In 1914, the late Jackson Dawson, then superintendent of the Arnold Arboretum, at Boston, Mass., created a splendid new type of hardy Azalea by crossing Azalea Kaempferi and Azalea Amcena. Of the seedlings thus produced a considerable number of them were grown at Boston from their infancy until flowering age, when the following ones of unusual beauty and vigor of growth were selected.

A BOOK "AZALEAS AND CAMELLIAS By H. H. HUME

Interest in Azaleas and Rhododendrons is greatly increasing. Until now, little information on varieties, care and culture of these plants has been available. Mr. Hume accurately and thoroughly describes the varieties best suited for various uses and discusses questions on culture, such as soils, fertilization, planting, propagating, and general care, indoors and out. He has taken special care to describe accurately the several groups of Azaleas and Camellias, and his suggestions on the use and culture are very practical. If you are growing Azaleas and Rhododendrons you will find this book much help. While the book is entitled "Azaleas and Camellias" it applies equally to Rhododendron culture. Price \$1.75, postpaid.

ALUMINUM SULPHATE

Azaleas, Rhododendrons, Blueberries, Cornus Florida, Heather, Kalnia and many other plants require an acid soil. Acid-forming organic matter, such as well rotted oak leaves helps to increase acidity. Aluminum Sulfate is a good chemical for increasing soil acidity by using 14 to 15 pound per square yard. Also used for turning hydrangeas blue.

10 lbs., \$1.25; 50 lbs., \$4.00; 100 lbs., \$6.00.

BUXUS MICROPHYLLA var. COMPACTA. New, rare, extremely dwarf and hardy Boxwood. Has stood all weather conditions in the Pocono Mountains where temperature drops below zero. Very dwarf and slow growing. Ideal for edging, rockeries, Knott gardens, and all uses where plants are required to remain dwarf. Original plant after twenty-eight years is now about 12 inches high and 21 inches wide. A rare gem. Stock very limited.

BUXUS SUFFRUTICOSA (Old English Dwarf Box). As a low edging in formal gardens there is no greater favorite than this variety of Box. This is the variety that is so much seen in Washington's garden at Mt. Vernon and in other noted gardens in Delaware, Maryland, Virginia and other Middle Atlantic States. Our plants are real bushy this season.

OUR SURE TO BLOOM STRAIN

When in bloom its fragrance sells it. Its small size and low price permits the customer to take it along. An ideal cash and carry item. Our improved strain blooms in May and again in August until frost.

Plants are solid, compact and symmetrical. The profusion of soft pink flowers attract favorable attention and the strong sweet fragrance clinches the sale.

Requires a cool house, a little room and only eight weeks to force into full bloom. Can be shipped safely throughout the winter months by freight, direct from growers, without damage.

HOLLY (*Ilex*)

We consider the Holly one of the very best ornamental trees or shrubs. Nothing is prettier than one of our American Hollies with great clusters of bright red berries and dark green leaves shining above the snow in winter. The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell. We know you who took our advice five years ago to plant Holly will confirm this.

Stellata <i>Waterlily</i> (Waterlily Magnolia)				
This new Magnolia was named "Waterlily" on account of its resemblance to a waterlily and its sweet fragrance. Supposed to be a cross between <i>Soulangeana</i> and <i>Stellata</i> . Bushy and twiggy somewhat like <i>Stellata</i> . Bears a great profusion of flowers about the same time to a little later than <i>Stellata</i> . Flowers are well placed on ends of branchlets measuring from 4½ to 6 inches across, consisting of from three to five layers of petals averaging from twenty to thirty to a flower. Buds are flesh-pink; flowers are blush-pink, fading to white. Some seasons the flowers are all nearly pure white. This is a very attractive Magnolia and well worth space in your garden.

Taxus (Yew)

It is only in the past few years that nurserymen in the United States have begun to really appreciate and grow the Yew. In England there are Yews more than a hundred years old, but unfortunately the English Yew (*Taxus Baccata*) is not reliably hardy in the north and many do not realize that the Japanese and many forms of *Media* are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil excepting it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many insect pests and plant diseases so destructive to many other evergreens.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

BACCATA HIBERNICA (Irish Yew). A strictly fastigate form, with stout crowded upright branchlets; leaves radially arranged around the branches, dark glossy green, more obtuse than in the type. One of the most desirable evergreens of columnar habit for formal gardens. Do not recommend planting north of Philadelphia.

TRANSPLANTONE

The Vitamin Hormone Stimulant For Plants

When seedlings, plants, shrubs or trees are transplanted, roots are usually damaged to some extent and growth is temporarily checked. The beneficial effect of Vitamin B-1 and other parts of the Vitamin B complex on roots has been established in research work by leading plant physiologists.

These chemicals and root-forming hormones are combined in TRANSPLANTONE to enable transplants to reestablish themselves more readily.

Thus a treatment of TRANSPLANTONE will stimulate old roots, hasten the formation of new ones and reduce the risk of interrupted growth or loss of plants.

3-oz. Can \$1.00—1-lb. Can \$4.00, Postpaid

WHAT ABOUT VITAMIN B1

Vitamin B-1 is necessary for root growth. Plants that lack this vitamin grow better when Transplantone is fed to them. For plants that have enough B-1, Transplantone is effective because it contains other important stimulating vitamins and chemicals. Transplantone is a balanced vitamin hormone stimulant for plants in general.

Root Cuttings Better and Quicker WITH

THE PLANT HORMONE POWDER

ROOTONE

PATENTS PENDING

**Just Dust and Plant—No Solutions
No Waiting—No Watching**

We recommend ROOTONE because we have found it of much help to us in rooting cuttings both in saving of time and in increased roots to the cutting. We use it on all the cuttings we put in. We know it pays us both in better roots and time saved in cutting beds.

ROOTONE Is Best For Cuttings Because—

LOW COST—Can treat 30 to 50 cuttings for one cent.

SIMPLICITY—No skill is needed to apply ROOTONE. No measurements, no vials, no elaborate charts to follow, or clock-watching are needed. Just dip in dry powder and plant.

SPEED OF ROOTING—The time of rooting of cuttings is cut by ROOTONE treatment to anywhere from one-half to one-tenth of the time required without treatment.

SURENESS OF ROOTING—Cuttings that root with difficulty, such as holly, magnolia, arborvitae, lilac and dogwood will respond in greatly increased percentages and in shorter time.

ROOTONE is a general stimulant for plants, supplying extra hormone at times when the plant is able to use more than nature provides.

ROOTONE treatment hastens and improves the rooting of cuttings; increases germination from seeds and bulbs, resulting in earlier flowering.

2-oz. Jar \$1.00—1 lb. Can \$5.00, Postpaid.

A two-ounce jar will treat up to 3000 cuttings; one pound will treat up to 40,000 cuttings.

No solution or soaking treatment is necessary. Just dip the base of the cutting in dry powder and set in the propagating bed or cold frame.

Aunt Mary's Sweet Corn

THE SWEET CORN SUPREME

This is the most wonderful sweet corn we have ever grown. One grower describes it as "the best sweet corn in the world."

Is of the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the corn-loving public than most any other variety and that appeal continues long after you are tired of other sweet corns.

Price liberal size packets, 35c each, 3 for \$1.00, postpaid.

If after growing this wonderful sweet corn you are not entirely satisfied we will refund every cent you paid us for it.

PAINTED WOOD TREE LABELS WIRED

Special to Florists

LYCOPODIUM

(Princess Pine)

We offer this season, a very good grade of Lycopodium (Princess Pine) treated to fire proof and dyed green.

Loose in cartons 25 to 100 pounds at 32c per pound, 100 to 500 pounds at 31c per pound, 500 pounds or more at 30c per pound, f.o.b. Pittsville, Md.

\$8.50 per dozen.

\$11.00 per dozen.

Try a sample shipment, we believe you will like it. Had several repeat orders last season.

Princess Pine Wreaths

We also offer heavy wreaths as follows:

14 in. with 5 clusters of berries (8 berries to a cluster) at \$6.50 per dozen.

16 in. with 6 clusters of berries (10 berries to a cluster) at \$9.00 per dozen.

Not less than a dozen of a size sold. Can make prompt shipment or book order for later shipment.

ROOT GRAFTS

We are again offering a list of Root Grafts of stock that is very much in demand at this time and is also very scarce. Advise ordering before Christmas if possible as we may not be able to furnish if ordered late. We will make up and reserve for shipment at the time you want them, or can send as soon as we get them made. Our supply will be limited due to shortage of root stocks and labor.

FLOWERING CRAB

\$12.50 per 100. For list of varieties see page 23.

FLOWERING CHERRY

\$15.00 per 100. Ask for list of varieties we can furnish.

RED OR PINK FLOWERING DOGWOOD

\$15.00 per 100. We have a very good strain.

LILACS

\$12.50 per 100. For list of varieties see pages 21 and 22.

WISTERIA

\$15.00 per 100. For list of varieties see page 33.

BLUEBERRIES are one of the real money crops. I am sure you will agree with this if you priced any on the market this past season. High prices for the fruit cause a big demand for plants. Better place your order for the plants early so as to be sure of getting them. See page 3.

This nursery was started just 38 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stay in business. If you have any reason for complaint, tell us.

Correction

Prices of Lycopodium on page 36 is wrong and should be as follows:

Loose in cartons 25 to 100 pounds at 32c per pound, 100 to 500 pounds at 31c per pound, 500 pounds or more at 30c per pound, f.o.b. Pittsville, Maryland.

Princess Pine Wreaths

14 in. with 5 clusters of berries (8 berries to a cluster) at \$8.50 per dozen f.o.b. Pittsville, Maryland.

16 in. with 6 clusters of berries (10 berries to a cluster) at \$11.00 per dozen f.o.b. Pittsville, Maryland.

We are sorry this mistake occurred but glad we found it in time so it could be corrected before mailing the catalog.
